VOLUME 26, NO. 2

WEST LIBERTY, MORGAN COUNTY, KENTUCKY, THURSDAY, AUGUST 8, 1935

WHOLE NUMBER 1296

R. A. Baldwin

Russell Atchison Fowler Baldwin was born Nov. 21, 1875, at Port Huron, Michigan, and died Aug. 2, 1935, at the Deaconess hospital, Cincinnati, O.

He was the son of Rev. Daniel and Harriet Baldwin, and had one sister, Hattie, and one brother, Dr. E. C. Baldwin, each deceased. He lived in Michigan until the age of 11, at which time the family moved to Colorado. He was educated at Alabama Military School.

He was married on June 12, 1915. To this union was born one son, Russell. He also assisted Mrs. Baldwin in the rearing of her two children by a former marriage, Mrs. H. L. Gentry and Drexel Moore. He was as much devoted to the educational and moral training of Winifred and Drexel as he was in his own son Russell.

Mr. Baldwin had been in failing health for over a year, but felt he had recuperated sufficiently to make a visit to Mrs. Gentry and family in Jackson, Mich. While on the way he was stricken in Cincinnati and rushed to the Deaconess hospital of that city, where he died.

In reply to his wife's question, "Lucky, have you anything to say?" he answered, "I have nothing to say—only that everything is all right, and do not worry."

He was a member of Montgomery Commandery no. 5, K. T. M. Sterling, and of Highland lodge no. 311, F. & A. M., West Liberty.

He leaves to mourn his loss his wife, three children, five grandchildren, one niece, Lois, living in Denver, Colo., and a number of other relatives and a host of friends.

Mr. Baldwin was a very high class business gentleman, public spirited, endeavoring to be of help to his community. His ideal was that men ought to live their Christianity daily. He highly respected the Sabbath or Lord's day, and advised his children to always observe that day and keep it holy. He was genial, optimistic, and had no enemies. The sympathy of the community goes to the bereaved family. His tender words, his sympathetic feeling, and his understanding of the common traits of humanity will cause him to be sorely missed, and to be remembered for many years, while his sheep in the unseen, awaiting the resurrection morn, to come at the call of God.

Mr. Baldwin, having lived here for a number of years, was known and loved by all the community. He had endeared himself to his friends to such a degree that it is hard to say goodbye. We say only say, "Sleep on, Father, take thy rest; God called thee, He thought it best."

Mr. Baldwin was a devoted husband and a loving father, and was happiest when doing something for those he loved.

Funeral services were held at the home Sunday, Aug. 4, with Reverends Harlan Murphy and I. J. Scudder officiating. The home and cemetery were pressed with flowers, was beautiful to see. Burial was in the Salyer cemetery with the impressive Robt. Temple service.

MARRIAGE LICENSES

July 1, Willie Adkins, Redwine, and Lydia Lewis, Stacy Fork.
July 3, Clinton R. Whit, Redwine and Beulah Elliott, Redwine.
July 6, Rev. Cox, Middle-town, O., and Maggie Adams, Middle-town, O.
July 7, Joseph A. Spradlin, Prestonsburg, and Margaret Mayo, Prestonsburg.
July 12, Thurlie Helton, White Oak and Lydia Lewis, Stacy Fork.
July 16, Emerson A. Peffer, Mina and Lucy Smith, Mina.
July 20, Aaron Lykins, Malone, and Bernice Deborde, Malone.
July 22, Park Oney, Lykins, and Vergie Gibson, Caney.
July 22, Paul Kelly, Relief, and Anna Johnson, Relief.
July 22, Granville Holbrook, Lenox, and Vida Adkins, Lenox.
July 27, Bonnie Allen, Channel City and Myrtle Davis, Channel City.
July 30, Wlick Carpenter, Keltney and Ethel Roberson, Keltney.

BAPTIST CHURCH

Prayer meeting and song service at 7:30 o'clock every Thursday night. Sunday school at 10 o'clock a.m. Church services immediately after Sunday school and also at 7:30 p.m. Everybody is invited to attend these services. "Not forsaking the assembling of yourselves together."

ROSCO BRONG, pastor

WAR CREEK SCHOOL

Supt. Iven Hancey, Godel Burton and Wm. McGilre attended the Parent-Teacher meeting here Friday, Aug. 2 for the purpose of furnishing another room for Miss Helen Spencer, assistant teacher, to teach in. A temporary plan was worked out by furnishing the church building. We appreciate very much the splendid cooperation of all.

The pupils have decided they need a first aid kit for each room. Money for this is being raised by the pupils donating either money or a chicken. There are in the treasury now 18 chickens and 60 cents. The chickens are kept and cared for on the school ground and furnish a splendid agricultural project. The pupils enjoy feeding them and watching them grow. They will be sold at the end of three weeks. Feed is furnished by pupils.

The boys of the sixth and eighth grades have organized a manual labor class under the direction of Eudox Johnson, principal, and are looking forward to a great success.

The spirit throughout our community is, "our duties should be considered before our rights." Let's keep that spirit going and hope for a successful school year.—Contributed.

SEWING CIRCLE MEETS

Channel City, Ky.—The Church of God Sewing Circle met July 26 at the home of the president, Mrs. W. T. Stamper.

The meeting was opened by singing "How Beautiful Heaven Must Be" and "Where the Soul Never Dies." Mrs. Stamper gave the devotional reading, 1 John 4. Mrs. W. J. Terrell led in prayer. The secretary, Mrs. M. H. Ferguson, read the minutes of the preceding meeting. After the usual business meeting the work was taken up and progressed nicely. During the social hour the hostess, assisted by Mrs. D. P. Peyton and Mrs. Victor Stamper served delicious refreshments of cake and lemonade.

Present at this very enjoyable meeting were Mrs. W. J. Terrell, Mrs. M. H. Ferguson, Mrs. Bessie Lykins, Mrs. Corbett Terrell, Mrs. D. P. Peyton, Mrs. George Collinsworth, Mrs. Louie Patrick, Mrs. Victor Stamper, Miss Gladys Benton, Miss Olivelette Seconde, Miss Wilma Benton, and Mrs. W. T. Stamper. The next meeting will be held with Mrs. M. H. Ferguson.

ATTEND 4-H CLUB CAMP

Twenty-three 4-H club members, three leaders, and the county agent attended the Quicksand 4-H club camp. Eight counties were represented at the camp. Twenty-four campers were selected. Five of the twenty were from Morgan county: Willie H. Hurt, Thelma Harrison, A. B. Peck, Julia Rose, and Maxine Hurt.

Willie H. Hurt has received a silver medal for being an outstanding camper. Maxine Hurt received a bronze medal for being a consistent camper.

All who attended the camp had a big time.

CHINESE BOY TO SPEAK

Gilbert Nee, a student in the mid-vest of Kentucky, will preach at the Methodist church at both the morning and evening services Sunday, Aug. 18. Mr. Nee, who is a native of China has been in this country only two years, but is a most pleasing speaker and is easily understood. He will tell us of the religious struggles of his people and the circumstances which led to his own enlightenment. He has a message that will stir your heart, one you cannot afford to miss. Every one is invited.

I. J. SCUDDER, Pastor

Celebrates Birthday

Betty Jean Arnett, daughter of Mr. and Mrs. G. B. Arnett, celebrated her eleventh birthday Sunday, Aug. 4, by taking the following friends to the theater to see a picture of Shirley Temple: Althea Lawson, Winifred and Genevieve Patton, Betty Jean Nickell, Isabelle Caskey, Geraldine Nickell, Anna Jean Peck, James Blair, Stuart Lawson, Don Sebastian, Ralph Galt, and Ralph Don Fankner. After the show she took them to her father's drugstore for refreshments.

Advertising Urged

A national co-operative advertising campaign to resell private banking to the American public is necessary, if banks do not wish to have the government take over their business, is the opinion of R. E. Doan of the Denver National Bank, Denver, Colo., in an article which appears in the August number of "The Bankers' Magazine."

Nickell Nominated

For Representative

The first primary for the party nomination of candidates for state offices, of which there will be held on Saturday of last week.

Republican voters in the main like to be told, and so a bunch of party leaders had got together and picked a ticket for their voters to vote for. The ticket has been approved by the party voters but they were not very enthusiastic about it.

In the Democratic ranks it was different. Here it was a free for all race and the number of candidates offering themselves for the various offices is evidence that there are still too many unemployed people in Kentucky.

In the race for governor, Rhea and Chandler, running neck and neck so far, outdistanced the other three candidates, Wallis, Huddleston, and Woodson, so that little notice was given them. Until the official tally is available, it is only guess work to name the approximate number of votes received by them.

French is known at this time to be sure that neither Mr. Allen nor

We expect to be able to print the official figures next week.

They Get Pineapple Juice At Bernarr MacFadden's School

PINEAPPLE juice is considered indispensable in the diet at the Bernarr MacFadden Foundation School, in Hackensack, New Jersey, where young boys and girls are kept on a healthy routine of playing, eating, sleeping and good manners. The youngsters in the pictures above are refreshing themselves with natural, unsweetened pineapple juice after several hours of romping and games on the spacious grounds of the institution. Just a glance at the good-looking youngsters on the right will convince any one that they really do enjoy it.

"Aside from its nutritive value and vitamin content," says Miss Fern Matson, supervisor of the school, "we find pineapple juice an excellent beverage for relieving fatigue and perk up sluggish appetites. It stimulates an interest in certain important foods which some children are not so keen about—spinach and carrots, for example." Miss Matson is pouring juice at the table to the left. She has several assistants who aid her in keeping the children on a strict, but not irksome, program which is calculated to make strong, healthy, and well-behaved children.

MAY TIGHTEN UP

Mrs. of the merchants of Morgan County have been very busy with the tax. In collecting the state's sales tax, performing in many instances to pay the tax themselves rather than to get assistance to any inconvenience. In making small purchases it often happens that the customer has not the exact change to pay the sales tax and the merchant has willingly assumed the responsibility for the tax. Some merchants, however, will only accept cash for their purchases and the customer has to come up with the cash.

At present there have been good natural resources. The less hope the tax the sales tax would soon have run its course and some merchants might be in a predicament.

Contemplating some form of sales tax, according to permanent merchants are working out a system to protect themselves. They feel that they just cannot continue to absorb the sales tax. The legislature had this tax on the consumer and the consumer must get ready to pay it in every instance.

Home Coming Day

A home coming day for members and friends of the Old Salem church on Grassy Creek has been called for Sunday, August 18. Bring your picnic lunch and enjoy the day with us.

MRS. T. S. RILEY, Lexington, Ky.

PERIN

Aug. 5.—Miss Lou Ward accompanied her aunt, Mrs. Edna Patrick, and Mrs. Patrick's daughter Irene to Winchester this last week end.

Mrs. Nora Nelson and daughter Florence attended church Sunday at Grassy Creek. Mrs. Lillie Phillips and daughter Lucretia were Saturday night and Sunday guests of Mrs. Anna Stamper of Tallport.

Miss Lillie Lou Ward is visiting her aunt in Floyd county.

Mrs. Edna Long and two daughters visited Mrs. Walters and daughters Sunday afternoon.

GRASSY CREEK

Aug. 5.—Mr. and Mrs. Asa M. Lykins and Mrs. Victor Gevedon were Sunday visitors at the home of Mr. and Mrs. Flint Ferguson.

Mrs. J. P. Gevedon and son H. C. spent Friday night with Mr. and Mrs. Arthur Ross of Dehart.

Mrs. Jenn Gevedon spent last Monday night with Rev. and Mrs. Ray M. Davis at Dehart.

Mrs. Willis G. Gevedon and sons Wendell, J. C., Peck, and Johnnie, of New Lebanon, Ohio, are visiting relatives in this community.

Miss Frances Kligor, who had been visiting her daughter, Mrs. A. B. McKim, at Morehead, returned home last week.

Our Sunday school is progressing nicely. Come and sit with us each Sunday morning at 10:30 o'clock. O. G. H.

Division of Construction NOTICE TO CONTRACTORS

Sealed bids will be received by the state highway commission at its office, Frankfort, Kentucky, until 10:00 a.m. on the 23rd day of August, 1935, at which time bids will be publicly opened and read for the improvement of:

MORGAN COUNTY—State Project. The Mize-Hazel Green road beginning at Mize and extending to the Wolfe county line, a distance of approximately 3.1 miles, grade and drain type of construction.

Bids are requested on the basis that if subsequent federal legislation shall require observance of maximum hours of employment and/or limitations as to age of employees, in the performance of state contracts, the contract for this project and any subcontract entered into thereunder shall be subject to modification to accord with such statutory requirements to the extent authorized or required by law.

The attention of prospective bidders is called to the prequalification requirements and necessity for securing certificate of eligibility.

The minimum wage paid to all skilled labor employed on this project shall be forty (40) cents per hour.

The minimum wage paid to all unskilled labor employed on this project shall be thirty (30) cents per hour.

Further information, bidding proposals, etc., will be furnished upon application to the Frankfort office. The right is reserved to reject any and all bids.

THE STATE HIGHWAY COMMISSION OF KENTUCKY
Dated—July 10, 1935.

PLANNING THE WORK

(Written for School Page)
By Ethel Mae Keeton

Well thought out planning is fundamental to success in carrying out any kind of work. The teacher is dependent upon the right kind of planning in order to carry out her objectives in the most effective manner.

The reason for this statement is that the teacher is constantly changing to meet modern conditions. Before the teacher begins the work of the term, the modern teacher must reacquaint herself with the latest problems of teaching.

Our objective in teaching is not to hear a lecture but to direct learning. The teacher is not to direct learning but to plan it. The teacher is not to plan it but to plan it.

The modern teacher knows that learning is an active process. Interest and activity are the guiding principles in planning the work. Planning is simply the determining of the organization to be used in classroom instruction. Plans must be made in content and in form.

Well made plans challenge the child to his utmost study and activity. Lesson plans should be carefully written and should be planned to meet the needs of the children. Their plans must be sound and meaningful. The planning teacher must therefore be progressively alert to the new aims and methods. The plans should be a servant to the teacher in her administration to the children.

Changing Curves to Tumbles

It seems that some of our Kentucky citizens, despite the beauty of the mountain scenery, insist on taking the curves out of our roads at inopportune times and at a moment's notice. Last Friday R. Kief Morrison of Louisville came at seventy miles an hour on the Paintsville road and just before hitting White Oak his car tumbled over right in the road and then settled down, a wreck. Dr. H. B. Murray with his wife and a friend, on their way to Paintsville, managed to stop in time to avoid a collision. He picked up Mr. Morrison, who was unconscious for thirty minutes, then seriously injured, and took him to the Paintsville hospital.

METHODIST CHURCH

Sunday school 9:45 a.m.
Mid-week service every Wednesday night at 7 o'clock.

Church services the first and third Sundays of each month at 11 a.m. and 7 p.m.

Young people's service every Sunday night at 8:15 o'clock.

A cordial invitation is extended to everyone to be present at all these services.

I. J. SCUDDER, pastor

Oil Wells at Sea Are Expensive but Pay Out

THE tremendous output of oil wells drilled at sea has justified the expense of this unusual undertaking near Ventura, Calif. A rich stratum of oil-bearing sand was discovered more than a quarter of a mile off shore. Drilling was started shortly afterward and the resultant wells far beyond the breakers have been a highly successful venture.

BEDTIME STORY FOR CHILDREN

By THORNTON W. HURGESS

A PLEASANT VISIT

SITTING safe and comfortable in the hollow stump to which Whitefoot the Woodmouse had led him, Danny Meadow Mouse told Whitefoot all about his adventures from the time he had visited the Sniffing Pool right up to the moment when Whitefoot had come to his rescue. Whitefoot listened without saying a word until Danny's story was ended. Then he gravely shook his head.

"It was a crazy thing to do, Cousin Danny. It certainly was a crazy thing to do," said he.

"What was a crazy thing to do?" demanded Danny, looking puzzled.

"Going so far away from home when there was no need of it," replied Whitefoot. "I thought you were too wise to take such foolish risks. At your age you should know better. It might be excusable in a youngster with no family to think of, but one of your age should have known better."

"I guess you are right, Cousin Whitefoot," replied Danny meekly. "I've learned a lesson I'll never forget. I've had frights enough to last me all the rest of my life and if I ever get home I'll never leave it again. I guess I ought to be starting along right now."

"I guess you ought to do nothing of the sort," retorted Whitefoot promptly. "The thing for you to do now is to rest and get yourself in condition."

Danny sighed. "I don't know, but what you are right, Cousin Whitefoot," said he. "I really don't feel as if I could face danger again this night. My nerves are rather upset. This is a very nice, comfortable place you have here. It is one of the most comfort-

foot many things about the Green Meadows. Whitefoot was sure that the Green Forest was the finest place in all the Great World in which to live. Danny was sure that it didn't compare with the Green Meadows, and they argued the matter over and over. But the argument was quite good-natured and simply showed that the things one is used to are the things one loves best. To Danny the Green Forest was filled with terrible dangers. To Whitefoot the Green Meadows seemed a place where there could be no such thing as real safety. So they argued and argued and had a perfectly splendid time.

Use Alcohol to Light Tombs

Evidence indicates the ancient Egyptians distilled alcohol for use in lamps to light tombs that were being decorated.

"What Was a Crazy Thing to Do?" Demanded Danny, Looking Puzzled.

Whitefoot looked pleased. "I'm glad you like it," said he. "I think it is rather good myself. I have two or three other places quite as good. Now the thing for you to do, Cousin Danny, is to stay here the rest of the night and make yourself right at home."

To this Danny agreed, for he really did not feel equal to going any farther that night. So he and Whitefoot slept a little and talked a great deal. Danny learned many things about the Green Forest and in turn told White-

Do YOU Know—

That the wedding veil is a relic of the canopy that used to be held over the bride to seclude her from profane gaze? The ancient Romans looked upon it as a protection against the evil eye, a superstition current among many tribes and nations.

Dear Mr. Wynn:

I have a puzzle for you to solve for me. I like to bet on horse races but always break about even. Here's how it is: One day I win but the next day I lose. What can I do?

Yours truly,

WILL I. FARRERWYN.

Answer: That is very simple, just play every other day.

Dear Mr. Wynn:

My father says it costs from \$3 to \$5 to have a tooth pulled by gas. Don't you think it could be done cheaper if the dentist used kerosene?

Yours truly,

A. KEETOOTH.

Answer: If you're not having the tooth pulled, why worry?

Dear Mr. Wynn:

We are a New York family, and my son, who has just graduated from high school, is preparing for college. I asked him what course he intends to study, and he says he thinks there is a great field for civil engineers. Do you agree with him?

Truly yours,

I. M. A. BRAKEMAN.

Answer: What New York really needs is civil taxicab drivers.

Dear Mr. Wynn:

Can you help me? For the past two weeks I have been despondent and have the most peculiar feeling. Sometimes I sit in a chair for hours and suddenly something within me seems to rise, then go down again, and a little later it rises again. What do you think is the matter with me?

Sincerely,

WHIGHT MESOON.

Answer: From your description, I should say you swallowed an elevator.

Dear Mr. Wynn:

I am a man forty-nine years of age. I have traveled all over the world and have just returned to settle down in America. I have a big problem to

Mother's Cook Book

GOOD ICE CREAM SAUCES

A SIMPLE ice cream of plain flavor served with a good sauce makes a most delightful dessert and is always enjoyed.

Fruit Punch Sauce.

Cook together one cupful of sugar and one-half cupful of water until it spins a long thread. Add one cupful of crushed pineapple, one-third cupful of marshmallows, cherries chopped, and some of the juice, two tablespoonfuls of lemon juice and a few grains of salt. Bring to the boiling point and chill.

Caramel Sauce for Ice Cream.

Put into a saucepan one-half cupful each of sugar and corn syrup and one cupful of cream. Mix and boil, stirring occasionally until it is of the right consistency. Add three-fourths teaspoonful of vanilla and a few grains of salt. Leave over hot water until ready to serve.

Maple Pecan Sauce.

Boil three-fourths of a cupful of maple syrup with two tablespoonfuls of butter until it makes a soft ball when dropped into cold water. Remove from the fire and add slowly one-fourth cupful of cream. Keep hot over water until ready to serve, then add one-fourth of a cupful of broken pecan nuts.

Pear Sultan.

Top vanilla ice cream with a pear cooked in a strap colored pink. Stick quartered blanched almonds into the pear and pour an apricot puree around the cream.

Eclair De Luxe.

Make eclairs five inches long, cut in two and place a long slice of ice cream between. Serve with any of the desired sauces, or with cream and nuts.

Cream Chocolate Sauce.

Mix one cupful of sugar, one-fourth

ONE SUMMER NIGHT

By ANNE CAMPBELL

SITTING beside you on the cool gray stone,

I saw through your dear eyes the summer night.

The trees were shadowy, their dark leaves blown

By perfumed breezes . . . In the misty light

Of the far moon, I caught the pure white gleam

Of your loved profile . . . With your quiet gaze

Turned on the stars lost in a happy dream.

You wandered far from earth's perplexing ways

Reaching space,

The silhouette of trees against the sky

And knew that nothing came but your face

You were my world . . . The moon that rode so high

The stars, as lost as I in mists of blue

Were moving. There was only love and you.

© Western News, Inc. (C) 1934

cupful of water and three tablespoonful of corn syrup. Boil until a soft ball is formed, add slowly four squares of chocolate melted over hot water, one cupful of cream and one-half cupful of vanilla; boil one minute, stirring constantly. Add a teaspoonful of vanilla and serve hot or cold.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By REV. P. B. FITZWATER, D. D., Member, General Assembly of the Presbyterian Church in the U. S. A.

Lesson for August 11

DANIEL

LESSON TEXT—Daniel 1:1-20. GOLDEN TEXT—Psalm 138:1-4. Daniel which is a story, which ye have read in the Bible.

PRIMARY TOPIC—The Story of Daniel. INTERMEDIATE AND ADVANCED TOPICS—The Story of Daniel.

The lesson committee has designed this lesson, "The Story of Daniel," in the use of this as a text. It is a story of a man who was taken into captivity by the Babylonians. It is a story of a man who was taken into captivity by the Babylonians. It is a story of a man who was taken into captivity by the Babylonians.

I. Daniel in Captivity in Babylon (vv. 1-17).

Daniel with his companions were carried away to Babylon in the first year of Jerusalem by Nebuchadnezzar. At the command of the king certain choice young men were carried away because they were "skilled in wisdom, and cunning in knowledge, and understanding science," that they might be trained to stand in the king's palace.

II. Daniel's Trials (vv. 18-27).

1. Conscience tested (v. 18). By the appointment of the king, a daily provision was arranged of the king's meat and wine for Daniel and his companions. This was contrary to the custom among the Jewish Jews. Being contrary to the Jewish customs they could not conscientiously partake of them.

2. The change of name (vv. 19, 20).

Among the Hebrews names were given to children which were most significant. Daniel means "God is my Judge." The significance of this name is that all the problems of life were submitted to God for a decision. God was made the arbitrator of his life. His name was changed to Belshazzar, which means "Bel's prince." It meant, therefore, one whom the chief god of the Babylonians favored. Hananiah means "gift or beloved of Jehovah." His name was changed to Shadrach, which signifies "blinded by the sun god, Itch." Michael means "who is as God." His name was changed to Meshach, which means "who is like the goddess, Shoshach, the gentle one." Azariah means "Jehovah is our help." This was changed to Abednego, which means "the servant of Nego." Back of the change of names was the attempt of Satan to wipe out the name of the true God.

III. Daniel's Courtesy (vv. 8, 12).

Daniel seems to have been the spokesman for the company. Although his heart was tried, he did not forget to be a gentleman. He requested to be excused from this meat and drink in order that he be not defiled. We should learn from this that in times even of great trials we should be courteous. When Daniel asked that a test be made as to the effect of the food upon the countenance of himself and companions, gracious consideration was given to them.

IV. Daniel's Triumph (vv. 14, 16).

1. As to physical health (vv. 14, 16). A test was made for ten days, and it was shown that Daniel and his companions were fatter in countenance and fatter in flesh than those who indulged in the eating of the king's meat. This meat and wine would have been a compromise of the conscience. It is obligatory upon God's children today to abstain from that which is contrary to his law.

2. Spiritual insight (v. 17). Because of Daniel's loyalty to God, Nebuchadnezzar's dream was revealed to him (2:1-45), and he was given visions sketching the whole history of the world.

3. Mental growth (vv. 17-20). Daniel and his companions were found to be ten times superior in matters of wisdom and understanding to their comrades. Those who abstain from indulgence in the use of strong drinks have clearer minds and are thus better equipped mentally for their work than those who indulge therein.

4. Their social and political preference (v. 19). They stood before the king. No higher position of influence and honor could have been given them.

5. Their temporal influence (v. 21). They were all advanced to positions of influence, and Daniel became president of the college of wise men, and the prime minister of the nation. This position he continued to hold during several dynasties.

Good Actions

Do you act as if you had ten thousand years to throw away. Death stands at your elbow. Be good for something, while you live and it is in your power. What remains but to live and cheerful, and crowd one good action so close to another that there may be the least empty space between them.

Habit

Habit is the magistracy of our lives; and, therefore, we should see that we have good habits.—Lord Bacon.

STATE OF MIND

Intuition is the result of the same result without reasoning.

KILL BLACK WIDOW

The deadly Black Widow spider's bite is decidedly dangerous to people.

Kill All Spiders... Watch for them in garages, corners of porches, etc. The minute you see them spray THOROUGHLY with FLY-TOX. It also kills FLIES, MOSQUITOES and other insects.

Be sure you get

ANNOUNCEMENTS

We are authorized to announce
PLEAS JOHNSON
of Leno

as a candidate for member of the
County Board of Education of Morgan
county subject to the will of the voters
at the regular election Nov. 5, 1937

FARMERS' COLUMN

THE FARM AND HOME

To control mosquitoes, flies and other insects with a mixture of equal parts of kerosene and old linseed oil. As mosquitoes are in cracks and crevices during the day and crawl out the fowls at night, the house and equipment should be well cleaned before spraying.

To insure proper diet for children milk should be served daily, eggs at most every day, tomatoes or tomato juice several times a week, a cereal every day, and at least two vegetables daily. Care should be taken not to overlook vegetables.

Late lands often need treatment for stomach worms, but care should be exercised not to injure them by over-dosing, whatever the remedy used. See a county agent for directions, and then measure the dose and administer them with care.

Much clothing and materials now on the market are so pressed that no allowance need be made for shrinkage when laundered. Many materials, however, will shrink, especially the cheaper goods, and it is often wise to make some allowance if they are to be washed often.

Kentucky farmers are finding trench sills, where properly constructed, satisfactory ways of preserving winter feed. Several hundred have been made in the state. Write to the college of agriculture for building directions.

Poor rubbers are often the cause of canned fruits and vegetables spoiling. Use only new ones from fresh stock. It also is often inadvisable to use old rubbers, especially if they are rusty and old imperfectly.

Growers Favor Adjustment Program

Lexington, Ky., Aug. 3.—Kentucky tobacco growers voted at the rate of about 19 to one in favor of continuing the adjustment program. In the referendum which closed July 27, according to an announcement at the college of agriculture.

Returns from 88 of the 108 Hurley counties showed a vote of 63,322 farmers favoring the program and 3,323 against it. Growers of fire-cured tobacco in 16 counties had voted 12,852 for the program and 1,079 against it; and growers of dark air-cured tobacco in 15 counties favored it 9,031 to 572.

Returns had been received from the large producing counties, and the final vote was not expected to change the ratio of the farmers for and against a continuation of the program after this year.

"The size of the vote shows the great interest in the future of the adjustment program," was the comment of Dean Thomas E. Cooper. The referendum was most commendable, in that it provided for a complete vote; that is, of non-signers as well as of signers. It thus gave a full opportunity for a complete expression of the opinion of tobacco growers.

County committees directing the program deserve much credit for the way they placed before farmers all of the facts concerning the tobacco situation, and for the success in bringing out a large vote.

Snapshots of KENTUCKY GEOLOGY

by Dr. A. C. McFarlan

UNIVERSITY OF KENTUCKY

Chapter XVIII

It was well known early in the nineteenth century that a "false salt peter" was present in quantities in the soil in some of the Kentucky caves. This was a nitrate of lime instead of potash, which after being dissolved from the "cave dirt" could be converted into true salt peter by leaching through wood ashes.

Mammoth Cave was purchased in 1811 by a Mr. McLean along with 200 acres of land for \$400.00, and resold a number of times, coming finally into the hands of Messrs. Gratz and Wilkins, who made a fortune out of its nitrate during the war of 1812. It was during this period that American farmers filled a great need when with the demand for gunpowder at a maximum, we were wholly cut off from foreign sources of supply, and of materials from which to make it. Ten thousand acres again served this purpose in the Civil war.

In Kentucky these nitrate deposits

were exploited in Mammoth and Carter Caves, perhaps also in others. In the main, negroes, transported to the "six carts" from the more accessible caverns and by sack from other rooms. The soil was leached in vats in the cave and then pumped out to open air boilers where it was concentrated. These leaching vats and wooden pipes may still be seen in the cave. Run three hoppers of wood ashes and boiled (saturated) salt peter crystallized out on cooling. On the average, a bushel of "cave dirt" yielded about four pounds of the nitrate.

The usual question of origin naturally follows. It is commonly believed that the nitrate comes from bat dung, so common in many caves, and it would seem to be an ample source of supply. It has been questioned, though, and the suggestion made that the nitrate is present in the overlying sandstone and brought down in solution by ground water.

men have had trouble with their legs. They have overcome the trouble and are now the three fastest mile runners in the world," said the announcer. It occurred to the writer that all our handicaps could be turned into stepping stones upon which we might climb to success. A poor memory should drive us to greater mental effort. Milton was blind, but this made him better with the eyes of his soul. Paul the apostle used prison cells for pulpits and writing rooms to get the gospel to men. God help us to turn our handicaps into blessings!

Frederic Blin said to Andy Gump recently, "The secret of being master is being masterful." There is good sense in that statement. It is necessary to be in order to do. The trouble with the world is so many folks are trying to do when they ought to be. We can't be Christians without Jesus Christ. We can't conquer unless in our own hearts we are conquerors. Jesus Christ is far more interested in what we are than in what we do. Jesus who knows all things knows that no man can permanently do good who is not permanently good. A man without will may run a short race, but only a man with will can run a long race. It takes moral will to run the race of life and not fall by the wayside. The religion of the world says "do and live." The religion of the Bible says "live and do."

Jesus taught that "Except a man be born again he cannot see the kingdom of God." It is not only true that I must be good if I am to do good, but I am bid to the best unless I am good. "The preaching of the cross is to them that perish foolishness, but unto us who are saved it is the power of God." I can have no real appreciation of the cross unless I am saved. Divine goodness can mean little to a man who is not divinely good. As a friend of mine once said, "What we need is to get this thing six inches below the collarbone and a little bit to the left." "With the heart man believeth unto righteousness." The heart is the important thing in human life.

Holsteins Test High
A report of the Holstein-Friesian association of America on herd testing shows that the herd at the Kentucky agricultural experiment station at Lexington averaged 13 pounds of butterfat per cow per day during the first 274 days of the test.

The 300-pound butterfat mark was topped by eight cows, with honors going to F. K. Edith, with a credit of 370 pounds of fat and 105.11 pound of milk. She was surpassed in milk production for the 274 days by F. K. Honorable Lass, whose yield was 11,445 pounds.

During the last month of the test F. K. Lad Florence led the herd with a yield of 85 pounds of fat and 2,250 pounds of milk. F. K. Lad Glen, a three year old, completed a lactation record of 497 pounds of fat and 11,721 pounds of milk in Class 1.

BOB JONES' COMMENTS

Recently the writer, who happens to have a radio in his car, tuned in on the college sports at Princeton university. He was greatly interested in the announcement that the three fastest mile runners in the world would begin in a minute to compete for the world championship. "Strange it may sound, all three of these

The FIRESIDE PHILOSOPHER

By ALFRED BIGGS

Big minds are always open.

Life is too short for revenge.

Nobody is all bad—none is all good.

Don't limit your politeness to your hat.

Work is substance; money is shadow.

Make your religion work seven days a week.

Christianity hasn't yet been given a fair trial.

The vices of today are the virtues of tomorrow.

NOW IS THE TIME TO GET A BUSINESS EDUCATION

To Young Men and Young Women:

Before you make final decision as to what you will do this fall, get facts about this institution. It is one of the large, old, growing, progressive business schools of America. Short courses leading to office positions, and long courses of college rank leading to commercial teaching or accounting positions. Get ready for a position and a position will be ready for you.

Ask for catalog.

BOWLING GREEN, KENTUCKY
At the very gates of the Mammoth Cave National Park

BIG RETURN IN FUR AND GAME BUSINESS

A business that pays a 100 per cent dividend is the American fur and game industry. The bureau of biological survey estimates the annual returns from game and fur resources total probably not less than \$200,000,000, and the amount expended in the protection and increase of fur, fish and game does not exceed 2 per cent of the yearly profits.

Fur and game production is a feasible and practical side line to forest and land conservation, and its increase under control is in no way detrimental to timber production, flood control, water conservation or the prevention of soil erosion. It is declared. Game management on a timber area may bring profits long before any income from the timber can be realized. It is pointed out. These profits will help to carry the expenses of public or individually owned forests.

In keeping with the policy of the biological survey and other co-operating government agencies in the conservation program, the bureau advises landowners to plant or salvage nut and food-bearing trees and shrubs and to intersperse cover growths and den trees.

WIND STORM REVEALS OLD CHINESE CITY

A terrific windstorm which recently swept over northern Honan uncovered the west gate and part of a street of the ancient city of Chufeng, according to reports from Kailenz, the provincial capital, says the New York Times.

Chufeng, which was a flourishing city situated between Wubai and Hsinhsing on the former bed of the Yellow river, was inundated by a disastrous flood in the early part of the reign of Emperor Chien Lung. Shortly after the Yellow river shifted its course and ran to the waters subsided no vestige of the city could be found. It had been completely covered by the mud and sand deposited as a result of the flood.

In the intervening two centuries the action of the wind has removed successive layers of mud and sand, until the last windstorm actually brought a part of the buried city once more to view. The provincial authorities have planned to continue the work of nature and completely excavate the ancient city.

11 Brothers in Football Team

Football in Denmark made history when a German team composed entirely of brothers met a Danish eleven near Copenhagen. The brothers are named Muntze and they hailed from Brauelhausen. They walked onto the field led by their father who, himself an enthusiastic footballer, initiated his sons into the game as soon as each could toddle. It was the first time the team had left their own country, though they had traveled much in Germany; and both father and mother Muntze accompanied the boys. Many at the game found the critical anxiety and swelling pride of father Muntze and the wistful absorption of mother Muntze at least as pleasant and diverting to watch as the game itself. They were genuinely sorry when the gallant eleven, in spite of excellent team work, was beaten 7 to 2.

Longest Bridge Started

Construction of what is claimed will be the longest bridge in Europe has been started across the Storstromen, in Denmark. It will be used by the Danish State Railways. Plans are under way for a bridge over the Great Belt, connecting the islands of Zealand and Funen. This would be nearly eleven miles long, making it the lengthiest in the world, and it would be supported on 104 pillars. The cost is estimated at \$32,500,000.

Fleas Hate Modern Girls

Scientists declare that fleas are becoming extinct. The reason for their gradual disappearance is the thinner and lighter clothing worn by women in recent years, which has dealt the race of fleas a fatal blow. The thick woolen dresses and stockings of earlier times provided them with hiding places; they cannot endure their present lack of shelter.—Pearson's Weekly.

Her Only Present

An old woman in a distressed area of Wales has written to the Personal Service league requesting that when she dies she should be buried wearing a shawl she has received from the league, "because it is the only present I have ever had, and I would not like to be parted from it."—Pearson's Weekly.

Millions for Nile Work

Strengthening of the banks of the Nile to prevent a recurrence of the recent floods will cost Egypt \$20,000,000 and the work will require 20 years to complete.

Volcano Erupts 700 Feet in Air

Eruption of Ruapehu, a New Zealand volcano, for the first time in 39 years, caused a column of water and steam to spout 700 feet from the crater lake.

Whitewashed

"How dough-faced Jean looks tonight," "Yes; she ran out of face powder and had to use flour."

Catastrophe

Visitor—Did your cat die a natural death?
Bobby—Yes, the cat ate it.

SOMETHING LIKE

Trilly had been attending Sunday school for just a few Sundays when his mother began asking questions. One question was, "Does your teacher ever call on you to answer any of her questions, Trilly?"

"Yes, mamma, she does. She asked me one last Sunday. She asked me what leprosy was."

"Well, how nice, and what did you answer, honey?" inquired the proud mother.

"Oh, I said it was something like a lion only with spots on it."—Ludlow apollis News.

Obedient Orders

"Look after the shop while I'm out," said the proprietor to his assistant, "and be civil to anybody who gives you orders."

Twenty minutes later the shopkeeper returned.

"Well, any orders while I've been away?" he asked.

The boy nodded.

"Yes, a gent came in and ordered me to put up my hands while he took the cash register," he replied.—Freeland's Own.

TOURS AND TOURS

Great Actress—I'm sorry I had that farewell tour. I don't believe I want to leave the stage at all.

Manager—Don't worry a bit. I can easily arrange a welcome back tour, old girl.

If You Want to Sing, You Do

Father had taken his small son to church. The boy sat and listened very attentively without saying a word until the clergyman announced, "We will now sing hymn two hundred and twenty-two. 'Ten Thousand Times Ten Thousand Two hundred and twenty-two.'"

The puzzled boy undid his father.

"Dad, we don't have to work this out, do we?"—American Boy Magazine.

Advice Hard to Follow

The Newlyweds were receiving a little conventional advice from the minister. First the husband was charged with his responsibilities, and then came the wife's turn.

"You must love, honor, and obey your husband," droned the parson, "and follow him wherever he goes."

The wife looked up at him.

"Fancy!" she exclaimed, "and Jim a deep-sea diver!"—Stray Stories Magazine.

Just an Apprentice

The Quack was selling an elixir which he declared would make men live to a great age.

"Look at me," he shouted. "I'm old and hearty, I'm over 300 years old."

"Is he really as old as that?" asked a listener of the youthful assistant.

"I can't say," replied the assistant. "I've only worked for him for 100 years."—The Bystander Magazine.

IN THE MODE

"They say women are to wear trousers this winter."

"Ah! I thought I noticed my wife viewing my last pants with a speculative eye."

Intelligent Interest

"You permit yourself some words of protest?"

"Yes," answered Senator Sorghum. "It would be a misfortune if people were all in such complete agreement that argument must cease. What would be the good of a big idea with nobody left to tell it to?"

"Constituted Authority"

Women—Belle's husband has no respect for "constituted authority" whatever.

Bridge Partner—He has not?

Woman—Not a particle! He smokes anywhere in the house, does not listen when she talks and once told her mother to "shut up."

There's a Nerve Test!

The candidate for a chauffeur's job was being examined by the car owner.

He got along all right until the questioner asked whether he had traveled much in other states.

The applicant had.

"All right, let's see you fold this road map."

Had Experience

An old lady who could not see eye to eye with the taxi driver on the question of fare, finally remarked:

"Don't try to tell me anything, my good man. I haven't been riding in taxis for five years for nothing."

"No," replied the driver, "but I bet you had a blessed good try."

ANCIENT LANGUAGE IS FOUND IN SYRIA

Discovery of a hitherto unknown pre-biblical Semitic language, revealing the source of the ancient and modern alphabets and offering a new key to controversial passages in the Bible, was announced by Dr. Julius J. Obermann, visiting professor of Semitic languages at Yale, writes a United Press correspondent.

Cuneiform tablets, found at Ras Shamra, near Antioch in northern Syria, disclosed the language of Canaan, and, according to Doctor Obermann, "are written in a new alphabet that proves to be the oldest known."

He termed the find as "an epoch making discovery in the field of Semitic antiquities and the most important find since the Babylonian cuneiforms have come to light."

The tablets, he said, were inscribed during or before the Fifteenth century, B. C., and offer a previously unknown link between techniques of cuneiform writing and the principles of alphabetic script. The Ras Shamra tablets, although written in cuneiform characters, employ only 30 signs, using them as alphabetic letters, whereas other systems consisted of hundreds of signs representing syllables or ideograms.

Chemical Sponge Sops Up Moisture From Air

A chemical sponge, with which moisture can be "sopped up" from air, or other gases "squeezed out," and used over again, is the latest tool of the chemical engineer, made possible by the introduction of activated alumina (oxide of aluminum), a white granular substance which is chemically inert and which will selectively absorb moisture, not only from gases and vapors, but also from liquids and solids.

It will absorb moisture from air and gases at 100 per cent efficiency until it has increased weight from 12 to 14 per cent and will then continue to absorb at lower efficiencies until a 20 to 25 per cent weight increase has been reached.

When saturated, it may be reactivated by aspirating inert gases through the activated alumina or by radiating heat from an electrical element or from hot oil or steam coils.—Cleveland Plain Dealer.

Opium From Poppy Straw

The control of the drug traffic is likely to be complicated by a discovery which has recently come to light in Hungary. It is a process for extracting morphine and other drugs from the straw and chaff of the opium poppy. Hitherto only the seeds have been used and the residue has been discarded as waste, but by the new process it will be possible to produce 800 grams of morphine base and 80 grams of codeine base from a single ton of poppy straw. The resultant increase in the output of these drugs will make it necessary for the authorities to exercise even more careful control over the traffic in opium.—Tit-Bits Magazine.

Leather Board Made of Scrap

Until recently, scrap leather has been almost useless to industry. Formerly it was used to make prussiate of potash, a process which became obsolete. Then the scrap material was disposed of by burning. Now, however, by the use of a new machine, continuous sheets of genuine leather board are produced from leather fibers obtained from scraps. Because of the tough and tangled nature of the fibers, it is possible to make a synthetic "hide" that rivals the original form of the leather in both strength and industrial usefulness.—Scientific American.

Gland Extract Helps Rats

A new thymus gland extract, tested on seven successive generations of white rats, has greatly accelerated their development. Each generation has an increased birth weight and a faster and fuller growth, opening their eyes and ears, erupting their teeth and beginning their hair growth in a fraction of the time required by the untreated rats. Some of them, writes Fredrick Foster, in Collier Weekly, weigh three times as much as normal rats at the end of eight days.

Slot Machine Odds 35 to 1

Mathematicians have figured out that the odds against the hopeful player who pushes nickels into a slot machine of average type are a trifle more than 35 to 1. Losses are fed into them at the rate of \$100,000,000 a month in New York, and losses at Monte Carlo hardly reaches that in a year. Rival gamblers fight to control their profits, as in the case of bootlegging, leading to frequent homicides and all sorts of lesser lawlessness.—St. Louis Globe-Democrat.

Ekimo Cannibalism Reported

The Far North as well as the tropics has some cases of cannibalism even today. Eskimos, on the verge of starvation, have been known to devour human flesh within the last couple of years in northern Canada.

Taking No Chances

Nexdore—Why are you lugging home that bouquet of flowers?
Naylor—Just playing safe. My wife kissed me this morning, so I took it must be her birthday or our wedding anniversary.—Montreal Star.

Classy Mystery

"Miss Passolich says there is a secret connected with her birth."
"That's true—it's the date."—Tit-Bits Magazine.

Personal

Dr. J. H. Whitaker of Canal City was on our streets yesterday.

Prattice Nickell made a business trip to Lexington on Tuesday.

Miss Emma Meadows, who has had an attack of appendicitis, is improving.

Laveria Lawson of Ohio returned home Monday after visiting her cousin, Alice, here.

Lola, daughter of Mr. and Mrs. Doran Lovely of Roscoe, is recovering from typhoid fever.

Mr. and Mrs. Frank Chandler of Palmsville attended the funeral of R. A. Baldwin on Sunday.

Forest Oney of Wayland is visiting his uncle and aunt, Mr. and Mrs. Benjie Lykins, of West Liberty.

Robert Cole and Finley Cole, of Wilmore, attended the funeral Sunday of Robert's uncle, R. A. Baldwin.

Mr. and Mrs. N. P. Womack of Wilmore were here Sunday to attend the funeral of their nephew, R. A. Baldwin.

MAX WANTED for Hawleigh Route of 800 families. Write today, Raleigh, Dept. KYH-200 SA, Freeport, Ill. (Ad.)

Mr. and Mrs. J. H. Poffrey of Akron, Ohio, returned home Monday after a week's stay with his brother, W. D. Poffrey.

Mr. and Mrs. Sam Franklin and two little daughters spent Sunday at West with Mr. and Mrs. Mack Cooper.

Mrs. Alden Stacy went home with her daughter, Mrs. B. F. Wheeler, to Detroit, Mich., Sunday, for a few weeks' visit.

Uncle Philip Arnett has been seriously sick several weeks at the home of his son, Floyd Arnett, and is no better at this writing.

Mr. and Mrs. H. L. Williams of Winchester were here over the week end visiting Mrs. Williams' parents, Mr. and Mrs. Benjie Lykins.

Mrs. Gardner Sprunk of Hazel Green, was in town Thursday and Friday of last week visiting her friend, Miss Laveria Faulkner.

Mrs. George Yost of Louisville and her father, Mr. Chatham, of Winchester, and a Mrs. Archibald, of Louisville, attended the Baldwin funeral Sunday.

Gardner, son of Mr. and Mrs. Ollie Lykins at Minton, while home from Berea on his vacation took typhoid fever. After fighting it for twenty days, he begins to improve.

Mrs. Henry Cole had as guests Friday her cousin, Mrs. A. N. McFerrin, and daughter Jessie and son Samuel, of Rodek, W. Va., and Miss Catherine Minton of Jonesville, Va.

Mrs. Roscoe Brong was called Monday to the bedside of her father, J. P. Conley, near Salsberyville. After being able to walk about for two weeks, he has again taken to his bed.

Mr. and Mrs. John Harmon of West Liberty accompanied Mr. and Mrs. H. G. Williams to their home in Winchester on Sunday. John will go on to Lexington to see other relatives.

Colza Helton and Mose Turner combined helton with pleasure in delivering a dairy cow to Logan, W. Va., over the week end. Mr. Helton's brother Russell was the purchaser of the cow.

Mrs. T. H. Caskey left Friday for Columbus, Ohio, for a two weeks' visit with her sisters and other relatives. She joins her daughter Nell, who is spending her summer vacation in Columbus.

Mrs. Lulu Benson, Misses Stella and Nell Helton, and their grandmother, Mrs. Lou Short, went to Preston on Sunday to visit their sister, Mrs. Elmer McNabb. Mrs. Benson returned leaving the others to a longer visit.

Dr. W. G. McClain of Monticello joined his wife and son Billy here Sunday and visited his parents, Mr. and Mrs. Amy McClain. His wife had been visiting her parents at Caney. They returned home yesterday.

Eight or nine years ago Morgan county was stricken with an epidemic of typhoid fever. During the time of the county health department, the county doctor and nurse worked persistently and won in a large measure the fight against typhoid and contagious diseases. But now typhoid has again broken out. Some doctors report as many as 15 cases, others 10.

The Courier goes to Grade A homes Earl Murphy of Murphyfork had business in town Tuesday.

Prichard Caskey is teaching at Jones Creek for Miss Patter this week.

Miss Elsie Stumper spent a week with her mother, near Maytown.

Miss Mildred Whit of Morehead normal school was home for the week end.

Miss Marcella McKenzle, who had a badly cut foot, is able to be out again.

Robert Patrick has a sore hand which has developed a case of blood poison.

R. A. Childers of Mt. Sterling has been visiting in West Liberty for a few days.

J. M. Elam got some badly cut fingers when his electric fan fell onto his hand.

S. Monroe Nickell of Lexington visited his son, J. Blaine Nickell, here, the first of the week.

Rev. and Mrs. M. H. Whit of Wright were dinner guests Friday of Rev. and Mrs. Roscoe Brong.

W. B. Reed of Salsberyville looked after his store here Monday in the absence of his son Marvin.

Bascom Elam and a Mr. Combs, of Liberty Road, attended Sunday school and church in town Sunday.

Mrs. W. H. Childers was called Saturday to the bedside of her father, R. A. Day, near Frenchburg.

Mr. and Mrs. Marvin Reed attended the funeral of their cousin, Orvil LeMaster, at Salsberyville, Monday.

The 4-H club will meet at the M. L. church Sunday at 2:30 p.m. All leaders and members please to present.

Dr. C. C. Burton's parents, Mr. and Mrs. S. H. Burton of Blaine, are spending the week with him and his family.

Mr. and Mrs. Henry Carter are leaving tomorrow to their home in Springfield, Mo., with a stop over in St. Louis.

J. Drexel Moore was home for the funeral of his step-father, R. A. Baldwin, who has returned to his work at Paintsville.

Dr. and Mrs. W. G. McClain and son Billy enjoyed a fine 6 o'clock dinner Monday with Mr. and Mrs. J. Blaine Nickell.

Mrs. Van Hendrix, Miss Catherine Nickell, and Mrs. Lucian Reed, of Winchester, attended the Baldwin funeral here Sunday.

Mrs. Flowers of Illinois and Mrs. M. Keyser of Pikeville, sisters of Mrs. Baldwin, attended the funeral of R. A. Baldwin here Sunday.

W. H. Sebastian is attending the Rotary club convention at Elizabethtown and Mrs. Sebastian is visiting friends in Louisville this week.

Mr. and Mrs. J. L. Blair met their son William Allen of Berea college at Winchester on Monday and brought him home for a month's vacation.

Mrs. J. P. Nickell's mother, Mrs. Ben Murphy, and Mrs. Noy Lewis and son Byron and his little son Reed, spent Thursday with the Nickell family.

Mrs. H. L. Gentry of Jackson, Mich., attended the funeral of her step-father, R. A. Baldwin, Sunday. She returned home Tuesday, taking her mother and her brother Russell along for a visit.

Mrs. H. H. Graham and son, Sunny Carter, and daughter, Miss Helen Carter, of West Palm Beach, Florida, arrived here Monday for a visit with her brother, W. P. Elam, and family.

Mr. and Mrs. J. D. Lykins and daughter Anna Ruth spent Sunday and Monday in Lexington as guests of Mrs. Lykins' sister, Mrs. Taylor, Robert Caskey was their chauffeur.

Miss Williamson, who had been visiting Dr. and Mrs. H. B. Murray, has returned to her home in Greenville. Mrs. Murray accompanied her and will spend two weeks there with her parents.

Mr. and Mrs. Roscoe Brong drove to Berea on Saturday to bring their sister Margaret home for the week end. She returned to school early Tuesday morning, accompanied by Miss Ruth Burk of Hue.

Mr. and Mrs. Jay Barton entertained Jay's parents, Dr. and Mrs. C. E. Burton, and his grandparents, Mr. and Mrs. S. H. Burton of Blaine, at six o'clock yesterday with a chicken dinner.

Mrs. S. B. Rose visited Monday her sister, Mrs. Prichard Nickell.

Mrs. Bill Oldfield of Murphyfork visited friends in town Monday.

Miss Ruth Wells of Martin is visiting Ella Ruth Childers this week.

J. B. and Laurel Nickell are visiting their grandparents at Murphyfork.

Miss Ella Ruth Childers has returned from a two weeks' visit in Columbus, Ohio.

Mr. and Mrs. Scott of Louisville visited their cousin, Mrs. W. H. Childers, this week.

Ben Murphy and D. E. Taulber, of Murphyfork, had supper Monday with Prichard Nickell and family.

Woodrow Stumper has been in bed the past week, barely escaping pneumonia, but is now able to be up.

Miss Lillian Wells, who has been in bed several weeks taking the rest cure for heart trouble, is improving.

The thermometer continues to register above 80 degrees, much to the discomfort of the people and to the advancement of the corn.

Mr. and Mrs. J. L. Nickell of Murphyfork were shopping in town Monday and enjoyed having dinner with their son Prichard and family.

Mr. and Mrs. Buford Wells are the proud parents of a fine boy born Aug. 1, 1935. He is a bright little man and both he and his mother are in a happy state of good health.

J. Blaine Nickell's sister, Mrs. Virginia Barnes, and little daughter, of Georgia, and his two nephews, W. P. and Billy Mayhew, of Barbourville, are visiting here this week.

Cut Boar's Tusks
The large, sharp teeth which are found in pigs at birth are temporary tusks. So far as has been discovered, they are of no value whatever to the pig, except as a means of defense, and for that purpose they are not needed on the farm. Tusks are a nuisance, in that with them the pigs often hurt each other and very frequently become the victim of the sow. For that reason, experienced hog men commonly cut these teeth close to the gums, with nippers which are made for that purpose. In removing the teeth, one should be careful not to injure the gums, since an open wound furnishes an ideal place for disease infection to take place. The proper time to remove these tusks is when the pigs are only a few days old. Certainly, they should never be left on a boar that is intended for breeding purposes.—Wallace's Farmer.

Clerical Attire Banned
In a determined campaign to break the power of the Mohammedan priesthood in Turkey, the government is determining that the clergy wear civilian clothes except when actually attending religious ceremonies. The ban on clerical attire in public applies to Moslems, Armenians, Catholics, Orthodox, Protestant and Jewish clergy.

NEW BRUNSWICK, N. J.—The Graduate School of Banking, an unprecedented educational project, opened under the joint auspices of the American Institute of Banking Section of the American Bankers Association and Rutgers University, with 250 enrolled students from 35 states and the District of Columbia, inaugurated here in June its first resident session.

The states represented and the number of registrants from each were as follows: Alabama, 2; Arkansas, 2; California, 2; Connecticut, 3; Delaware, 3; Georgia, 3; Idaho, 1; Illinois, 8; Indiana, 2; Iowa, 1; Kansas, 1; Kentucky, 2; Louisiana, 3; Maryland, 1; Massachusetts, 9; Michigan, 5; Minnesota, 1; Missouri, 5; Nebraska, 1; New Jersey, 31; New York, 50; North Carolina, 1; North Dakota, 1; Ohio, 7; Oklahoma, 1; Oregon, 2; Pennsylvania, 32; Rhode Island, 1; Texas, 5; Virginia, 6; Washington, 1; West Virginia, 1; Wisconsin, 4; Wyoming, 1.

The annual resident sessions of the graduate school will be supplemented during periods by continued extension work for the students at their homes. The purpose of the school is to offer an advanced study of the various administrative problems in banking and trust institutions. The teaching procedure is a combination of the case study and the lecture discussion method.

The Curriculum
The curriculum embraces banking, illustrative problems and policies, bank investment problems, legal and managerial aspects of trust business, and phases of bank administration, economic problems in the field of money and credit. The public relations and responsibility of banks and methods for meeting these obligations are emphasized in the courses.

It is planned to set up similar schools in cooperation with other universities in various parts of the country. The school will add 200 registrants each year for two years until 600 are enrolled.

The trustees of the Educational Foundation of the American Bankers Association have set aside funds from the foundation to grant 100,000 scholarships of \$150 each to qualified students for all classes at the school.

TELLS HOW BANKS AIDED PROGRESS

Economist Describes the Ways Banking Institutions Have Contributed to Development of United States

OMAHA, Neb.—Privately owned banking, despite its faults, has served America well, William A. Irwin, Professor of Economics, Washington College, Topeka, Kansas, declared in a recent address here on "Banking in a Changing World."

"Under the leadership of individual banking has helped to bring this country to a foremost place in economic development among the nations of the world," he said. "The small community has been developed by the individual bank. The frontiers of America have been pushed forward by the help and counsel of the individual banker. The checks of wars and depressions in a century and a half have been withstood with the assistance of the individual banker."

Change May Be Necessary
"It may be that we have reached a tide in the affairs of America when new methods are needed. It may be that we have come to a point where the individual should be submerged for the greatest good of the greatest number."

"It may even be that complete centralization of the banking system has become an economic necessity in our complicated social life. But the banker ought to be satisfied that these things are so before he should give up his light for the system we have known. We came to greatness under that kind of banking; we should not give it up without unmistakable proof of the absolute necessity of such a change."

The American Pattern
Professor Irwin said that the proposal which has been advanced for coordinating banking operations in the national interest under a "Supreme Court" for banking is typically American and ought to have the most serious consideration of those elements which are clamoring for political control, which is typically un-American.

"It is not wise, he said, to oppose changes as such, but that bankers should 'see to it that change, if and when it does come, shall preserve all that is good in the past and stick as closely as possible to the American pattern of things.'"

Banking is properly a conservative profession, he pointed out, and should cling to practices and principles of banking that are, and always have been, fundamentally sound.

"It is to its credit that so large a group of its members never faltered, even in boom times, in their allegiance to those sound principles," he declared. "We probably owe our salvation from chaos to that fact."

BANKS AND COLLEGE LAUNCH NEW SCHOOL

Aims to Offer Studies in Advanced Banking Subjects to Bank Executives—Public Duties of Banks Stressed

NEW BRUNSWICK, N. J.—The Graduate School of Banking, an unprecedented educational project, opened under the joint auspices of the American Institute of Banking Section of the American Bankers Association and Rutgers University, with 250 enrolled students from 35 states and the District of Columbia, inaugurated here in June its first resident session.

The states represented and the number of registrants from each were as follows: Alabama, 2; Arkansas, 2; California, 2; Connecticut, 3; Delaware, 3; Georgia, 3; Idaho, 1; Illinois, 8; Indiana, 2; Iowa, 1; Kansas, 1; Kentucky, 2; Louisiana, 3; Maryland, 1; Massachusetts, 9; Michigan, 5; Minnesota, 1; Missouri, 5; Nebraska, 1; New Jersey, 31; New York, 50; North Carolina, 1; North Dakota, 1; Ohio, 7; Oklahoma, 1; Oregon, 2; Pennsylvania, 32; Rhode Island, 1; Texas, 5; Virginia, 6; Washington, 1; West Virginia, 1; Wisconsin, 4; Wyoming, 1.

The annual resident sessions of the graduate school will be supplemented during periods by continued extension work for the students at their homes. The purpose of the school is to offer an advanced study of the various administrative problems in banking and trust institutions. The teaching procedure is a combination of the case study and the lecture discussion method.

The Curriculum
The curriculum embraces banking, illustrative problems and policies, bank investment problems, legal and managerial aspects of trust business, and phases of bank administration, economic problems in the field of money and credit. The public relations and responsibility of banks and methods for meeting these obligations are emphasized in the courses.

It is planned to set up similar schools in cooperation with other universities in various parts of the country. The school will add 200 registrants each year for two years until 600 are enrolled.

The trustees of the Educational Foundation of the American Bankers Association have set aside funds from the foundation to grant 100,000 scholarships of \$150 each to qualified students for all classes at the school.

HARRIS SPARROWS' HABITS REVEALED

Although many birds are exceedingly secretive about their nesting habits, there are probably not more than four or five species native to this country that have been so successfully observed as the Harris sparrow. Whatever this bird may be it has been observed by one recently with the discovery and collection of the nest and eggs of the Harris sparrow, near Churchill in the Hudson bay country. The find was made by Miss A. M. Heywell, Cornell biology student, and the nest and eggs have since been added to similar exhibits in the Smithsonian Institution in Washington, D. C.

Harris' sparrow has been described by Barrows as having the proportions and general appearance of the white-throated sparrow, but being rather larger and having no stripes on its head. The head is mainly black in the adult as is also the chin, throat and middle of the breast, he says. This bird flies south in winter as far as the midwestern states, but its nesting habits in the Hudson bay district is so restricted that it was located finally only through an intensive search.—Detroit News.

Which Side Do You Sleep On? Makes No Difference

That right-handed people go to sleep on the right side and left-handed people go to sleep on the left side is a theory that has been widely accepted by psychologists for years. Dr. Donald Laird, professor of psychology at Colgate university, questioned the truth of the belief and made observations and collected additional data by a questionnaire sent to 150 persons. As a result the old idea is exploded, says the Montreal Herald.

Dr. Laird found that among right-handed people there was no dominating preference for sleeping on either side, and among left-handed people there was a somewhat greater preference for left-side sleeping, but this, however, was not very marked. Out of the records of the survey he assembled two groups, one of right-handed right-side sleepers and the other of left-handed left-side sleepers. He arranged to have each group sleep for a certain number of nights on their habitual side and record the restfulness and other factors concerning their repose, and then to sleep on the other side, number of nights on the other side, making similar records. These sleepers reported that they went to sleep at once on 67 per cent of the nights they slept on the habitual side, but only 43 per cent of the nights they slept on the non-habitual side.

Dr. Laird feels that until further evidence on the subject is obtained people would be wise to continue going to sleep on the habitual side, especially if they are left-handed.

Oxygen, Man's Enemy

Oxygen, which gives us life, is also man's greatest industrial enemy. The air we breathe contains one-fifth oxygen, and this gas is a highly corrosive substance. When a house burns down it is simply combining with the oxygen in the air. When soap turns brown on a chemist's shelf it is merely another instance of the corrosive quality of oxygen. But it is the motor industry that suffers most from the ravages of oxidation. 15, two chief organic essentials, rubber and petrol, are especially susceptible. Thousands of pounds worth of these materials have been utterly wasted owing to the action of air—and now the scientists have struck back. They have been experimenting with the development of substances known as antioxidants. These compounds when mixed with any product, slow down oxidation to such an extent that its usefulness and life are increased tenfold.—Pearson's Weekly.

60,000 in Pilgrimage
Nearly 60,000 men, all ex-soldiers of 15 nations, recently took part in the largest pilgrimage ever made to the shrine of Our Lady of Lourdes at Lourdes, France. Three former enemies stood guard over the famous grotto, they being, at the request of the Frenchman, a German, a Belgian and a resented were the United States, Canada, Great Britain, France, Belgium, Italy, Germany, Hungary, Austria, Czechoslovakia, Poland, Estonia, Latvia, Lithuania and Brazil.

Bridge Over Dry Land
The town of Leskovats, Yugoslavia, has been fighting five years over a \$100,000 bridge which crosses dry land. Only a week after the span was thrown across the Morava river the stream changed its course and the city hasn't persuaded provincial authorities to appropriate money to force the river back to its old channel.

Not Too Much
Customer—I want a box of crackers.
Clerk—Plain or salted, madam?
Customer—You may put a little salt on them, but not too much. My husband does not like them too salty.

Geography, Not Anatomy
Registration Official—Where were you born?
Girl—Nebraska.
Official—What part?
Girl—Why, all of me, you see.

Friend or Foe?
"As a young man," said the tanned veteran in the hotel lounge, "I took part in the Zulu war."
"Really?" said his young and fair companion. "On which side?"

That Old News Story Again
"How did you get on in your action for compensation against the man whose dog bit you?"
"His lawyer proved that I bit the dog."—Pearson's Weekly.

What's the Answer
"Dad, is Latin a dead language?"
"Yes, my son."
"Then why don't they bury it?"—Answers Magazine.

At a Distance
Tom—Do you play golf?
Ellen—Oh, dear, no. I don't even know how to hold the caddy.

Too Much Gab
Harbor—Shall I go over it again?
Victim—No; I heard it the first time.—Answers Magazine.

GATHERED JOKES

My Little Sister
"What's the difference between a woman and a pig?"
"A woman—she's a pig."

The Busy Day
Nature Teacher—What is the longest day of the year?
Wilbur—The day when I am examined.

Something Needed
Friend—Nice car you got. What do you want for it?
Driver—A girl.—Pearson's Weekly.

Sour Notes
"Buy a nice asphistera, lady?"
"No, go away. We're not musical."—Tit Bits Magazine.

You're Next
"Well, no one can say anything but good about her."
"No; let's talk about somebody else."

Slowpoke
He—Why do you call me "Tadpole"?
She—Because every time you call you make a little progress!

Oh, Waiter!
Customer—Will the spaghetti I ordered be long?
Waitress—We never measure it, sir.

Both Sides, Please
"To you learn hard work?"
"Yes—it's hard to get on account of the price. The coal itself is soft."

Gobble, Gobble!
Landlady—What are you doing with the turkey?
Do you wish?
Boarder—Some of the meat, please.—Answers Magazine.

Or Something
He—How long of you I could become anything?
She—How long a unit—barely.—Answers Magazine.

Whittles Out Circus and Town for Big Exhibition

After five years of tedious work, a California man with an absorbing passion for the circus has succeeded in obtaining one of his own, says Popular Mechanics Magazine. The jungle where this man trapped his animals, however, was a garage in the back of his home and the lions, tigers, elephants and other beasts, including more than 100 horses, are all miniatures of wood, whittled out of four pieces of wood. The animals, several circus wagons and many figures representing circus people, and when the circus was finished, he whittled out a town where his circus might parade.

He then mounted a platform, wagons and figures on a wheel 15 feet in diameter, one section being placed along the town's Main street. Involving the wheel parades his circus through the town. As each unit enters, a mechanism animates the animals and figures so the lions and deer pace back and forth in their cages, the horses move up and down and the clowns go through their antics. A phonograph plays march music as the parade moves and the man behind the scene gives the animals voice.

Shells Help Science
Guns during the World War had no idea that they were firing up to light archeological treasures. In the shell holes in Jugoslavia, members of an expedition sent out by Harvard university have found traces of a city which is back to the Bronze Age. Nearly 200,000 sites have been marked out as a result of the studies of this expedition. In them, future digging will take place. Incidentally, by making a 30-mile survey of the territory, the scientists have uncovered Roman roads and fortifications, which before were thought only to exist in local legends.—Pearson's Weekly.

Red, White, Blue Lights Aid Band
The One Hundred and Twenty-first artillery band uses red, white and blue electric lights to add to the pageantry of its night parade. Each bandman has a red light on his right foot, a blue one on the left and a white light in his cap, current being supplied by small batteries attached to the belt. Separate lights illuminate the brass drum and the drum major's baton.

Air Flow Made Visible in Test
Flow of air currents around model airplanes, automobiles, trains and other construction has been made visible. A smoke screen, forced at high pressure over the object under test, is used in producing the visible air flow. Tests indicate that the more streamlined an object, the smoother the air currents flow over it.

Time Change

Over-Frankness in Matter of Truth Will Not at All Times Be Acceptable, or Justified

Can you tell me why the whole world is so afraid of the truth? Why people imagine you to tell them the truth but want you to tell them only what they hope to hear? "A woman who is trying to write comes to you for your opinion. 'The truth,' she says, 'I want to know the truth.' What she wants to hear however is that all the editors who have sent back her work are ignorant or stupid or condescending to print only the products of their friends. If you really tell her the truth—that what she writes has neither the benefit nor entertainment value demanded by the readers whom editors must satisfy—you get for your thanks a story book, and the knowledge that you have joined the roster of the 'unappreciative' or 'unlucky.' Why, oh why don't they want to know the truth?"

"And then the people who come to you for advice on their problems with husband or children. They do not really want advice as you see their problem from your detached viewpoint. What they really want is to hear that they have the best husband in the world and the finest children, and therefore no problem at all if they will only take the way of least resistance. Why do they ask advice if they don't want it? Why, oh why don't they want the truth?"

This by no means novel question, put to an ethical authority, drew the following answer: "I am sorry, dear reader, but I can't help wondering in this complex business that is life, if any of us has the right to set ourselves up as knowing the truth. For my part I should shrink from the terrible responsibility of pointing out to anyone arbitrarily the truth about anything."

"I feel that way about assuming the cloak of authority even in matters in which I can claim experience. I should hesitate to discourage creative effort. There is always the danger, in condemning a piece of work, of mistaken judgment. More than one masterpiece that has been crowned with the laurel wreath of greatness was at

one time dismissed by all to whom it was submitted as so much trash. One of the most successful as well as meritorious plays of recent years had production a year or so ago almost by accident after being rejected by every manager on Broadway. Much of what is today considered great in modern painting would at one time have been regarded as the pastime of lunatics. So who are we to give final judgment?"

"And when it comes to domestic matters, why should we assume that our detached position and our viewpoint hold the key to truth? To my mind there is in such personal prob-

lems no arbitrary general 'truth.' What may be right for one person under certain circumstances may not be right for another. Each problem between a husband and wife or a family and children, seems to me an equation between those particular warring or balancing forces. Put yourself in the place of one of them and you completely change the equation. So how can we presume to dictate the 'truth'?"

"It is logical to ask, 'Why do people come to us in this way for help and advice which they do not want?' But we do not have to go far for the answer. They come to us for help. It is true, though not for advice. And the help they crave is encouragement, reinforcement, a bolstering up of their belief in themselves or those they love. That is why it is so obvious what they want to hear. And since many of us must take part of life's happiness in the currency of illusion, it may indeed be the province of a true friend to help to maintain that."
